PORTFOLIO

Front End Web Developer(Remote)

ASCON (Lagos, Nigeria)   March**,**2017 – till present

url: ascon.gov.ng

Responsibilities:

- Currently working on rewriting the whole front end of the website in Angular
- Created **TypeScript** reusable components and services to consume **REST API's** using Component based architecture provided by **Angular8.**
- Rewrote all the stylesheets from normal CSS into SCSS for scalability and overall site performance
- Wrote javascript and CSS animations across different pages in the website
- Developed new contents and updated existing contents using HTML,CSS,javascript, typescript and Angular.
- Ported and redesigned the Lead management system using **Angular frameworks** implementing modular design.
- Actively involved in maintaining and updating the website with consistently increasing responsibilities.
- Designed and developed contact form using Angular8 reactive form modules
- Performed client side validations using Angular 8 validation
- Performed client side animations using **Angular 8 animations**(trigger,state,style,animation, transition)

Front end Developer

DataShare Technologies(Lagos,Nigeria) April**,**2013 – Jan 2017

Responsibilities:
- Developed all the UI pages using **Angular JS, Node JS, HTML, CSS3, JSON, JavaScript, jQuery, Ajax.**
- Used **Angular 2 & 4** frameworks for binding, DOM models linking, view model underlaying data and behaviours.
- Developed dynamic responsive Web Application by integrating **Angular JS** with **Bootstrap** which is further integrated with Web Services.
- Involved in upgrading and maintenance of new layout using the Grid orientation model **Bootstrap framework.**
- Worked with **Angular** for creating own **HTML** elements for building a companied website which is an open source project.
- Created view-model and controllers and worked with demo **JSON** data and services until **API** gets ready.

- Used **jQuery** core library functions for the logical implementation part at client side for all the applications.
- Used **jQuery** to traverse through a DOM tree and manipulated the nodes in the tree. Implemented the Drag and Drop functionality using **jQuery framework.**
- Applied **XML** into transferring administration data to the back end.
- Created modular **CSS** using **LESS** for reusability and easy to read code.
- Responsible to for making the pages dynamic using **AJAX**, **JSON** and **jQuery**.

PIG GAME

url: https://alabi4good.github.io/pig-game/

This is a game written by me from the scratch using vanilla Javascript. I also used Animate.css to provide   animation effects to the game.

BUILT WITH: HTML5,CSS3,JAVASCRIPT

WEATHER APP

url: https://myweatherappng.herokuapp.com/

This is an Angular weather App for dynamically displaying the current weather condition of your present location and that of the major cities worldwide.I deployed this app on heroku.
